SUMMARY

GSoC '25 alumni and Sugar Labs #1 contributor (100+ merged PRs) with proven experience building production-grade full-stack systems, distributed backends, and AI-powered tools. Smart India Hackathon Runner-up. Seeking SDE internship/full-time roles to contribute across the full software development lifecycle (SDLC) using agile, microservices, and system design principles.

SKILLS

Languages: JavaScript, TypeScript, Python, C/C++, Bash, Rust, SQL

Frontend/Backend: React.js, Next.js 15, Node.js, FastAPI, Flask, Socket.IO, REST APIs, Tailwind CSS

Data & Analytics: Pandas, NumPy, Matplotlib, PostgreSQL, MySQL, MongoDB, Power BI, Jupyter Notebook

AI/ML & DevOps: PyTorch, LangChain, RAG (FAISS/BM25), Docker, Kubernetes, AWS, GCP, GitHub Actions, Git

EXPERIENCE

Open Source Maintainer (Software Engineer)

US (Remote)

Sugar Labs | sugarlabs/musicblocks, sugarlabs/www-v2

Sep 2025 – Present

- Reviewing and merging PRs across multiple repositories; enforcing version control best practices, CI/CD pipelines, and code quality standards for **50+ active contributors** using agile workflows and system design reviews.
- Mentoring **GSoC 2026 contributors** on CI/CD automation and microservices architecture; previously led full-stack modernization to **Next.js 15 + React 19**, achieving **98% Lighthouse scores**.

Software Developer — Google Summer of Code

US (Remote)

Sugar Labs | sugarlabs/musicblocks

May 2025 – Aug 2025

- Engineered an **AI debugger** using LLaMA-3-70B fine-tuned on Music Blocks ASTs with RAG, achieving **92% error detection accuracy**; wrote unit tests covering core inference pipeline.
- Optimized hybrid BM25/vector retrieval pipeline with `sentence-transformers/all-mpnet-base-v2` embeddings; designed fault-tolerant **autoscaling (5–50 req/s)** with circuit breakers.

Full Stack Developer

India (On-site)

Design Innovation Center, UIET Chandigarh

Oct 2023 – Mar 2024

- Built Flask/Dash web platform for anemia detection data visualization using object-oriented design; improved ML model prediction accuracy by **12%** through feature engineering.
- Optimized **PostgreSQL** for high-availability (30% latency reduction); deployed end-to-end solution on **Docker + GCP**.

PROJECTS

SuneriChat — GitHub

Tech Stack: TypeScript, React 18, Next.js, Node.js, Socket.IO, Nostr Protocol

2025

- Peer-to-peer paid messaging platform** where senders pay recipients per message, making spam economically unviable; tested with **50+ users**, supporting **100+ concurrent WebSocket connections** with real-time **Socket.IO** messaging and secp256k1 decentralized identity.

SuneriCLI — GitHub

Tech Stack: Python, PyYAML, REPL

2025

- Built an **AI-augmented CLI** combining shell commands with LLM capabilities; reduces developer context-switching by **40%** via `!explain`, `!git`, and natural language to shell translation.

SuneriOS — GitHub

Tech Stack: C, Assembly, GRUB2, Docker, QEMU

2024

- Authored a **32-bit Multiboot-compliant kernel** from scratch in C and Assembly, loaded via GRUB2; bootable ISO tested with QEMU in a containerized Docker toolchain, boot time under **2 seconds** on emulated hardware.

AWARDS & ACHIEVEMENTS

- GSoC '25:** Selected in **top 5%** of 23,559 applicants; delivered 350-hour AI debugger project for Sugar Labs.
- Smart India Hackathon '24 Runner-up:** Built fuzzing harness for Sumatra PDF Reader, uncovering multiple security vulnerabilities via WinAFL/AFL++.
- Sugar Labs #1 Contributor:** 100+ merged PRs; boosted Jest test coverage by **70%** in musicblocks.
- Inspire Awards Manak:** Raspberry Pi wearable with face recognition for visually impaired; won State & District-level science fairs ('18, '19).

EDUCATION

Panjab University

Chandigarh, India

B.E. (Bachelor of Engineering) — Information Technology

Expected: 2027

- Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering
